

Epiphany Dermatology Acquires Dermatology Consultants of Albuquerque

Partnership improves access to great dermatologic care

Austin, Texas — March 14, 2017 — Epiphany Dermatology (www.epiphanydermatology.com) announced today it has expanded its presence in the Albuquerque market through its acquisition of Dermatology Consultants of Albuquerque, PC (“DCA”). Epiphany Dermatology is comprised of leading dermatologists committed to improving access to great dermatologic care.

Originally founded in 1974, DCA has a long history of providing quality dermatology services to patients in the greater Albuquerque market through its single location. Through this acquisition, DCA’s dedicated providers and support staff have joined Epiphany in a partnership grounded in exceptional patient care.

Dr. James Icken, a board-certified general dermatologist with special focus on skin cancer prevention and detection, commented, “I decided to join Epiphany due to their caring team who share my values. Over the years, as a solo practitioner, the day-to-day administrative burdens have become more difficult to manage, while maintaining the high-quality dedication to patient care that we strive for daily. The partnership with Epiphany offers many advantages that mine can never achieve on its own. I also believe that Epiphany’s culture is one of collaboration and thoughtfulness at every level. We have formed a true partnership, and I am excited about the support they will bring, and thus allow me to focus on patient care.”

Gheorghe Pusta, Chief Executive Officer of Epiphany, said, “We are pleased to form this partnership with Dr. Icken and the staff at DCA, who have provided clinical excellence in Albuquerque for many years. This is an exciting opportunity to expand our provider network and improve access to great dermatologic care in the Albuquerque marketplace.”

Through this partnership, DCA’s providers and staff gain additional resources to help with operations, managed care, marketing, compliance, recruiting, and many other areas.
