SavATree Continues to Grow Through Acquisition of Downey Trees, Inc. – Expands Georgia Presence and Enters Florida Marketplace

Bedford Hills, NY — June 15, 2020 — SavATree, an industry leader in professional tree, shrub and lawn care, has announced the acquisition of Downey Trees, Inc. of Atlanta, Georgia, a full-service company providing tree care and other services with offices in Norcross and Savannah, Georgia and in Destin, Florida. This marks SavATree's first entry into the Florida market and expands its Georgia presence into Savannah. Downey Trees and SavATree's current Norcross branches will combine to form a stronger metro-Atlanta presence. SavATree now has 43 branch offices proudly serving customers in 23 states.

Since 1984, Downey Trees has focused on serving commercial clients, property managers and homeowners' associations, becoming one of the largest locally-owned companies in the Southeast offering tree care, plant health care, vegetation management, retention pond management and emergency response services. As a result of the combination with SavATree, Downey Trees clients will now have access to a wider range of services including professional lawn care, tick and mosquito treatments, deer deterrents, organic options and consulting services.

"With the addition of these three locations we are able to develop and expand our market presence further into the Southeast region, which has been a priority for some time," noted SavATree Executive Chairman, Daniel van Starrenburg. "We're excited to accomplish this by joining forces with Downey Trees. We welcome their dedicated, knowledgeable team and believe the union with our existing Norcross office will be beneficial for both teams and customers. We are further excited to have a new entry into Savannah and the Panhandle area of Florida."

Downey Trees owner Paul Bagley stated, "We are very excited about this combination. SavATree shares our philosophy about quality, values and standards, so it's clear that our two expert teams put together will yield an even stronger, more impactful result for our clients."

About SavATree

SavATree provides environmentally sensible tree, shrub and lawn care to residential and commercial properties throughout the country. Property programs feature organic and hybrid plant health care, lawn care and general tree care—all highly customized to meet the needs of each landscape and steward.
